

What is Sound ?

Series of **Compressions** and **Rarefactions**

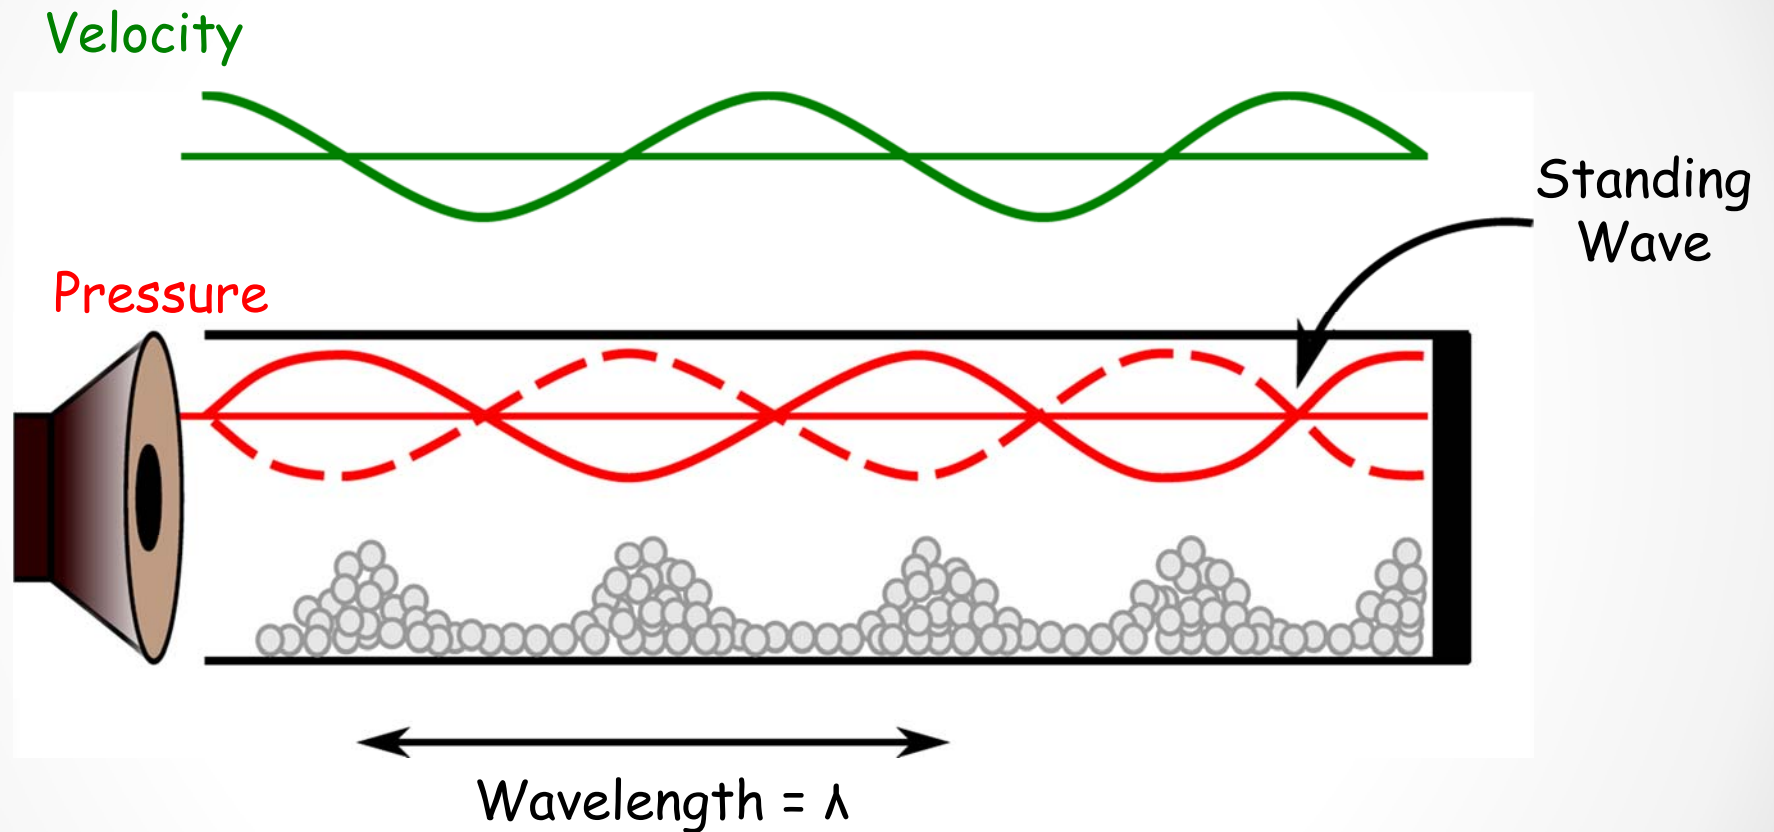

Speed of sound = c (m/s)

Frequency \rightarrow

$$f = c / \lambda \text{ (Hz)}$$

Sound inside a Duct

Kundt's Tube

Oscillations

?

Outcome
Unpredictable

Gas Turbine Engine

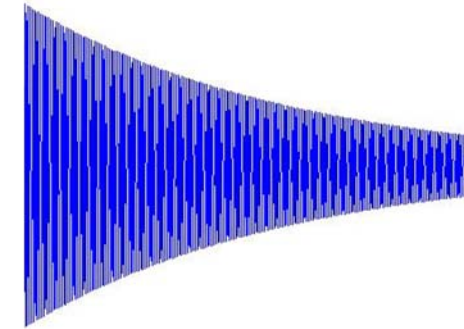

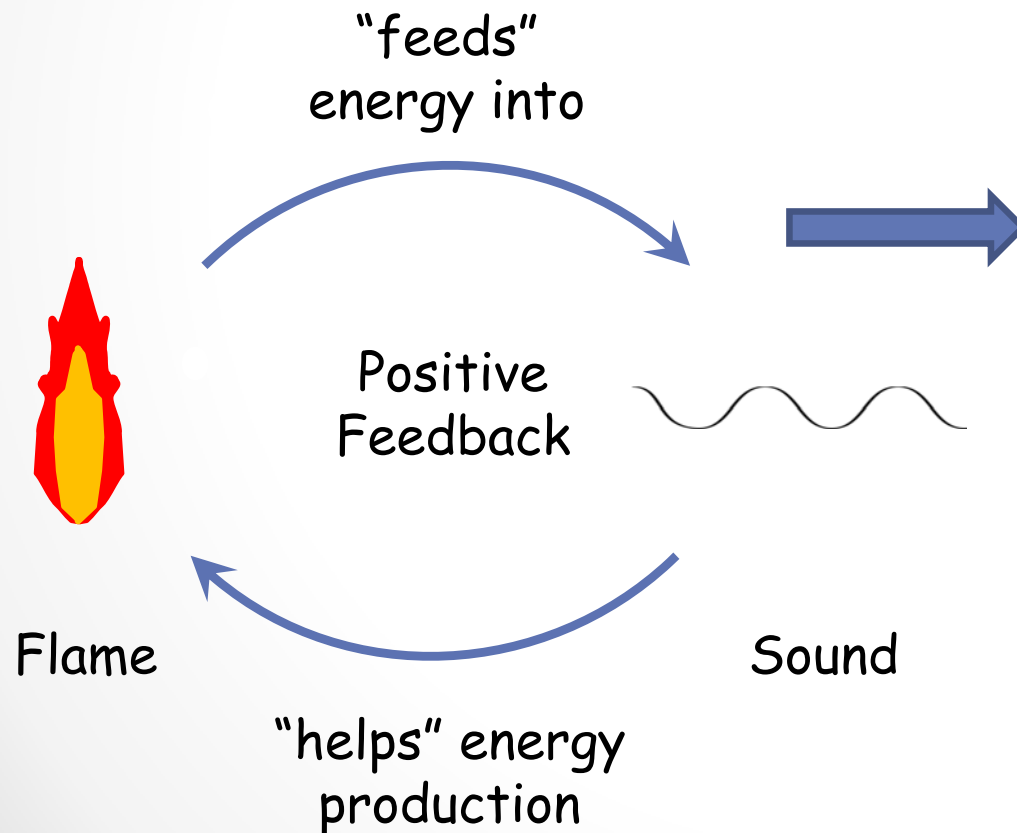

Combustor

Combustor

Instability

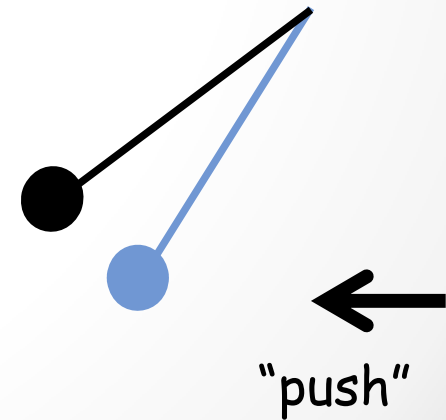

Stable pressure plot

Results in high amplitude oscillations !

Unstable pressure plot

Combustor

Combustor

- Multiple reflections
- Multiple frequencies
- Amplitude changes with time
- Outcome unpredictable

COMPLEX !!!
