# Flow-Flame interaction

Alp Albayrak

Dmytro Iurashev

Keele

17/09/2014

In your bottle, air and water were fighting  
each other

Gurgles

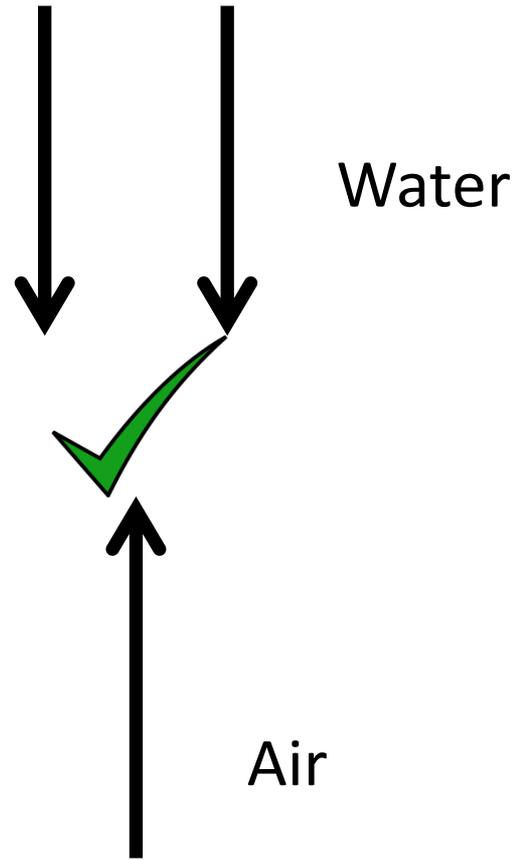

Water

Air

In my bottle, there was a peace

Air tunnel

It is easy to prepare a tea burning a gas

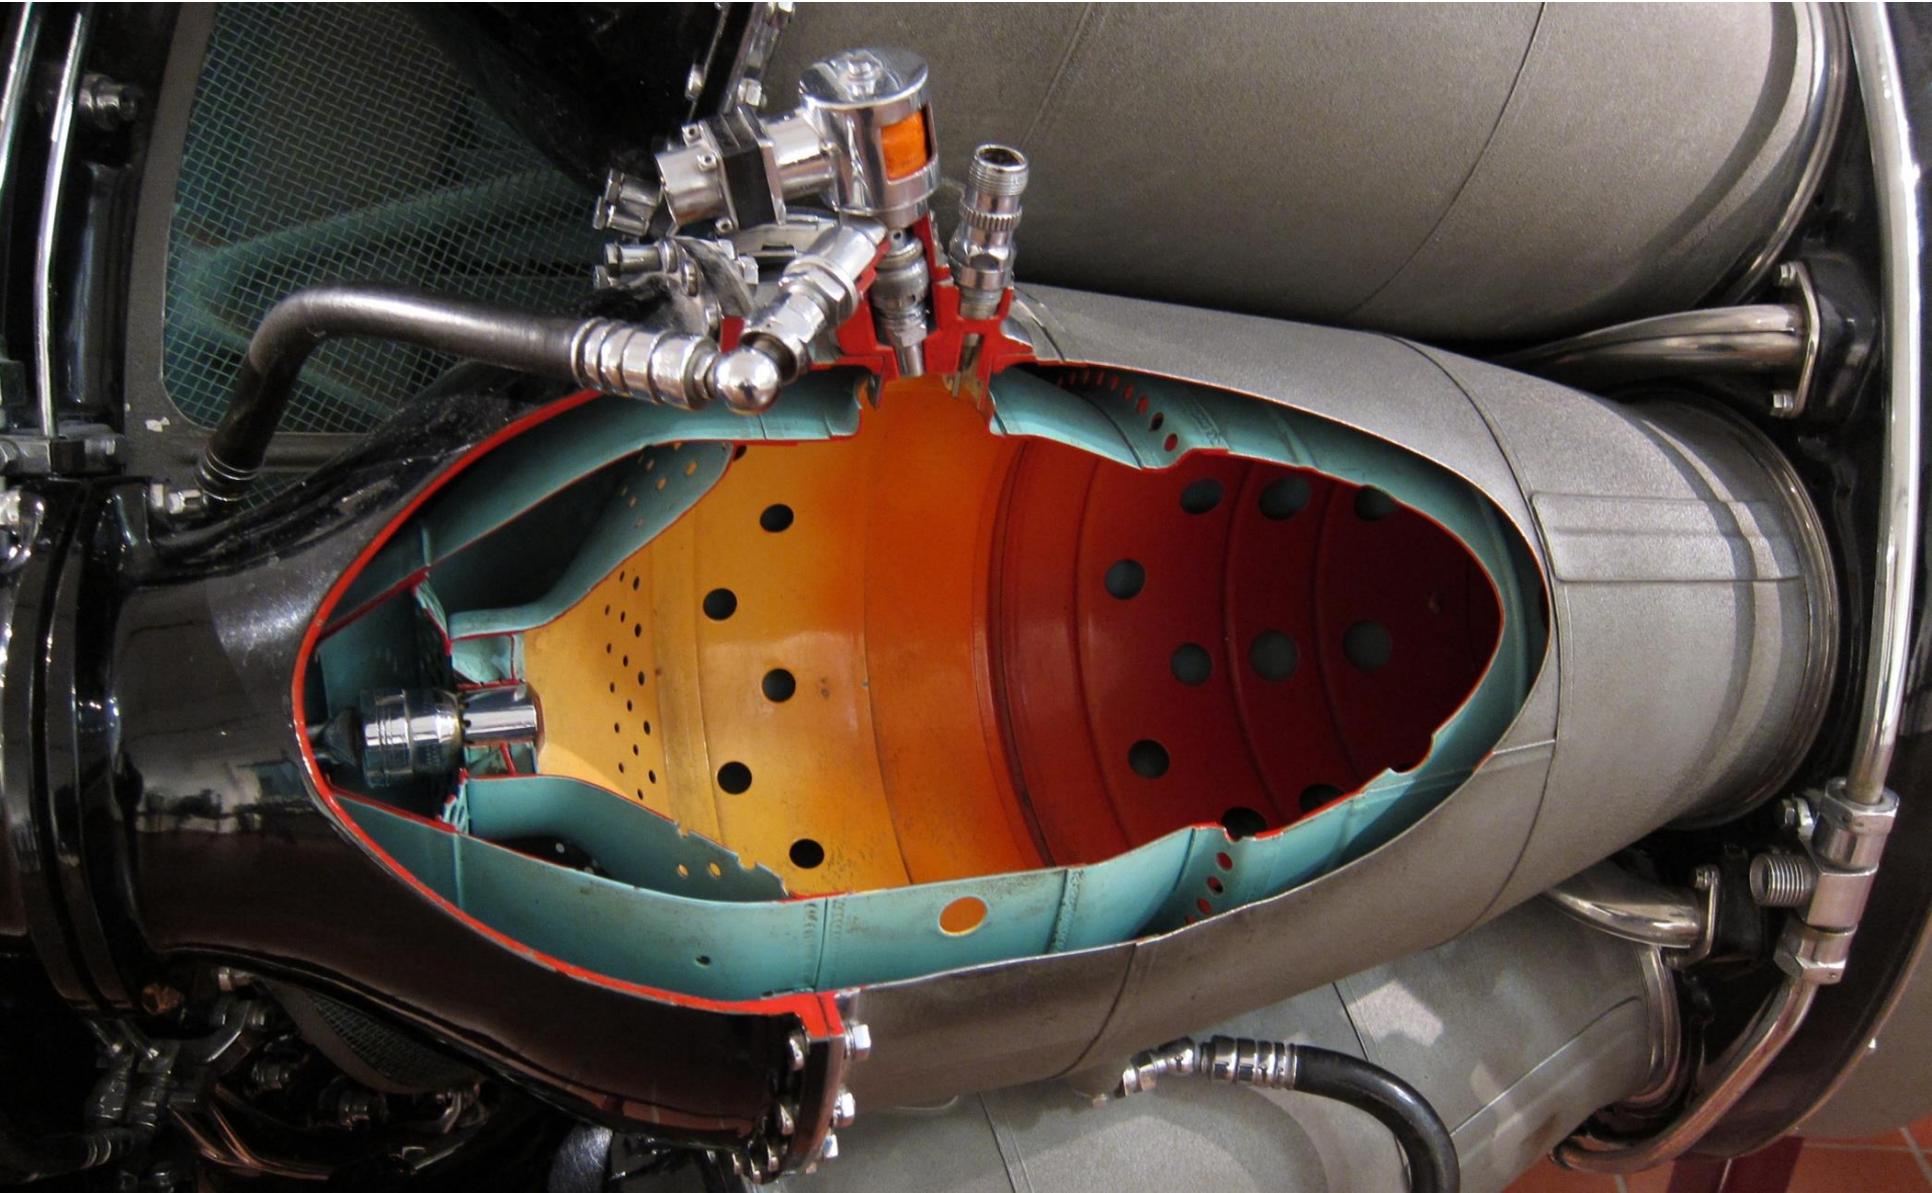

# What about more power?

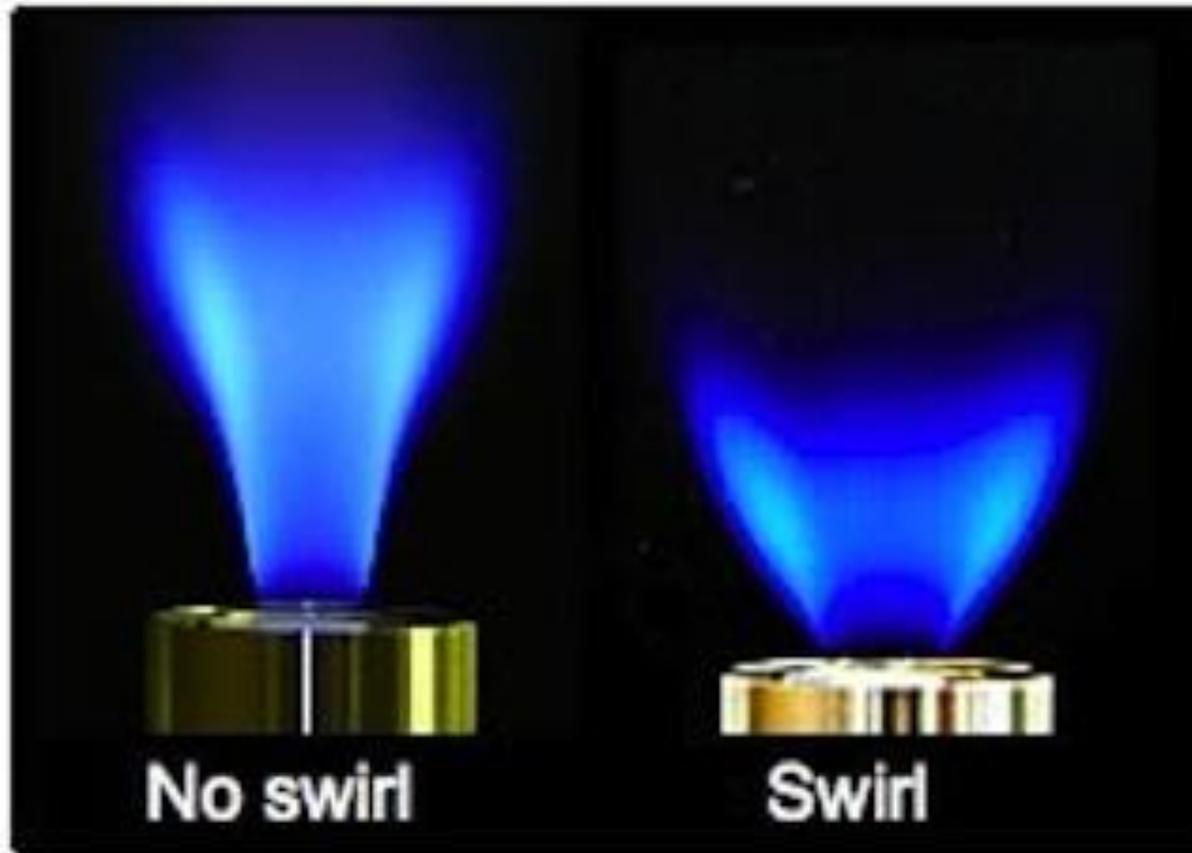

Sometimes flames can be quenched

What if it happens during a flight?

Flames with swirl are shorter and more stable

# Because of magic vortices!
